

SailSpark Technologies – Power & Electrical Solutions

Powering Progress: Our Advanced Electrical Solutions

At SailSpark Technologies, we're redefining what's possible in the world of electrical engineering. Our Power & Electrical Division offers future-ready solutions designed for safety, reliability, and performance tailored to the most demanding industries.

What We Do:

- HT & LT Line Installations Up to 33kV with complete commissioning & testing
- Substation Construction & Transformer Services Design, install, upgrade & maintain
- Smart Power Automation SCADA, PLC, and IoT-based remote monitoring systems
- Generator Synchronization Auto load sharing & priority-based management
- Energy Optimization Power factor correction, harmonic filtering, and cost-saving audits
- Lightning & Surge Protection Shielding critical systems from unpredictable events
- Renewable Integration Hybrid and grid-tied solar solutions with battery backup

Why Clients Choose Us:

Certified safety compliance (NEC, BNBC, IEEE)
High-quality OEM components (Schneider, Siemens, ABB)
On-time project delivery with 24/7 technical support
Transparent engineering, tailored to your needs

Need a trusted partner for your next electrical project?
Let's connect and power your operations the smart way.
